

Tower Camera

Experience the fusion of IR imaging, radar, and AI for long-range 360° 5-dimensional coverage

THROUGH THE LOOKING GLASS

Designed with complete situational awareness in mind, this multi-sensor tower creates a secure communication network of electronic intelligence allowing users to perceive, interpret, and act on hazards before danger gets close. The TowerCam's wave radar system is continuously seeking objects and will determine their distance and speed of travel. Combined with IR day/night vision and AI, the TowerCam provides situational analytics, escalating relevant events and alerts for streamlined, time-sensitive monitoring. The resilient TowerCam delivers superhuman surveillance and split-second action in challenging environments.

- **Detect, recognize, and identify threats** from 10m to 1Km
- **Intelligence at the edge** delivers insightful performance with minimal network impact
- **Highly redundant architecture** reduces down-time risk and MRO complexity
- **Inbuilt battery backup** allows for continuous operations despite power fluctuations
- **Innovate pod design** ensures robust performance with greater flexibility and customization
